

JOHN'S INDUSTRIES

Michigan manufacturer John's Industries is a one-stop shop for all your rear end and driveshaft needs. They offer

housing centers, axles and assorted parts to complete, ready to bolt-in units. In addition they also offer brakes from a finned aluminum rear drum kit to 10 & 11-inch drums plus a complete line of Wilwood disc brakes.

Shown here is John's polished aluminum big bearing pinon support with billet aluminum 1310 yoke w/ polished u-bolts. The 31-spline Detroit Locker with Motive 3.70 ratio ring and pinion. Other features include forged aluminum main caps and solid adjuster nuts of this unit that is designed for lightweight vehicles where weight reduction is critical. All units are available in your choice of gear ratios.

If you're building a show rod or just want to add some sparkle under that street rod or street machine you should opt for the highly polished case. The case is polished to perfection and will be a show stopper at your next event or cruise night. Prices starting at \$1,645.00.

For more information on the endless number of options visit the website at: www.JohnsIndustries.com or give them a call: 800-332-3450.
